General Directions for Observation and Instrument Use

The Observable Indicators of Nursing Home Care Quality Instrument is designed to measure the multidimensional concept of nursing home care quality. Answer the questions after 20 to 30 minutes of walking through the nursing home. Walk through general living spaces, hallways, and areas generally available to the public.

Plan the observation time during usual visiting hours, such as 10am to 4pm. Begin by making observations of the facility outside. Upon entering the facility, make observations of the facility such as noise level, presence of odors, if residents are calling out, if staff are paying attention to residents who are calling out, if staff stop and speak to residents, if residents are smiling at staff, if staff are ambulating residents, how the home's environment appears, and if staff are focused on caring for residents. Be aware and think about what you see, hear, smell, and feel. Watch for staff helping residents with eating or encouraging them to drink. If possible, conduct a walk through near a mealtime.

Complete the instrument after walking through the general living spaces, hallways, and areas generally available to the public. If you have difficulty scoring a particular item, you may need to walk through some areas a second time to answer all items. For best results, total all the scores on each page and transfer them to page 8 before you leave the facility.

The reliability of the instrument is improved if more than one person completes the instrument. Have a family member or friend accompany you during the tour and each person should complete a separate instrument. Do not talk with each other about your answers until you have both answered all the questions.

A note about choosing your answers: Scores for each item range from 1 to 5, with 1 being the worst and 5 indicating the best care quality. But the answers themselves vary, so be sure to read them carefully. Some items may require asking staff about the care and services—such as items 7 & 8. **IT IS NECESSARY THAT ALL QUESTIONS BE ANSWERED FOR THE TOTAL SCORE TO BE OF VALUE.**

CIRCLE all the answers on each page, add the scores on each page, and write the total for the page in the box at the bottom of each page. After you have answered all 30 questions, follow the directions on Page 8.

TOTAL SCORE (Add page scores)	

INTERPRETATION:

A SCORE EQUAL TO OR ABOVE 128 SUGGESTS A QUALITY NURSING HOME.

A SCORE EQUAL TO OR BELOW 103 SUGGESTS A NURSING HOME WITH QUALITY ISSUES.

SCORES BETWEEN THESE NUMBERS ARE TYPICAL OF MOST NURSING HOMES.
