**Bag Examples**

Prepare bag before taking off mask.

1. Label bag with name, date and how many times you have used the mask. New bag must be made after each use.

2. The bag has to be open wide and stay that way

3. Doff N-95 respirator holding both straps together to control the mask and ensure the straps don’t touch the front of the mask.

1. Hang face shield on outside of bag.

4. Bags stored overnight in clean accessible area close to entry where staff are screened
